

IT-as-a-Service Running on Azure

How MSPs can make real money in the public cloud

It's simple. ITaaS gives MSPs the ability to put their clients' complete infrastructure onto Azure rather than only handling piece parts of their clients' IT environments.

Why Azure?

...and Azure is growing, totaling \$6.9 billion in revenue last quarter.

As a result, Azure adoption is on the rise:

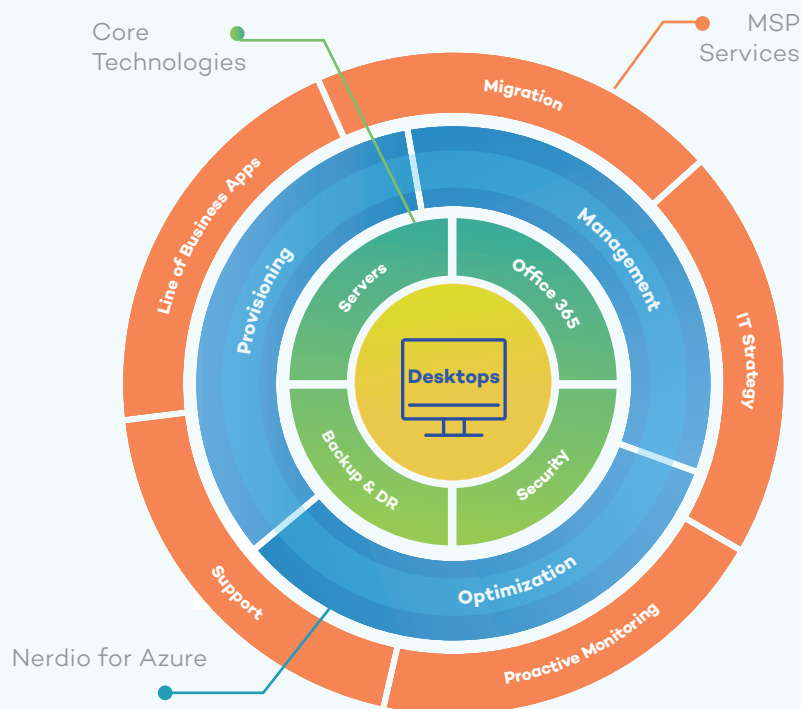

IT-as-a-Service at a Glance

ITaaS is comprised of three layers: core technologies, MSP services, and management layer.

It is this management layer that is the super glue holding it all together:

Nerdio for Azure - the automation platform for ridiculously easy provisioning, management, and optimization.

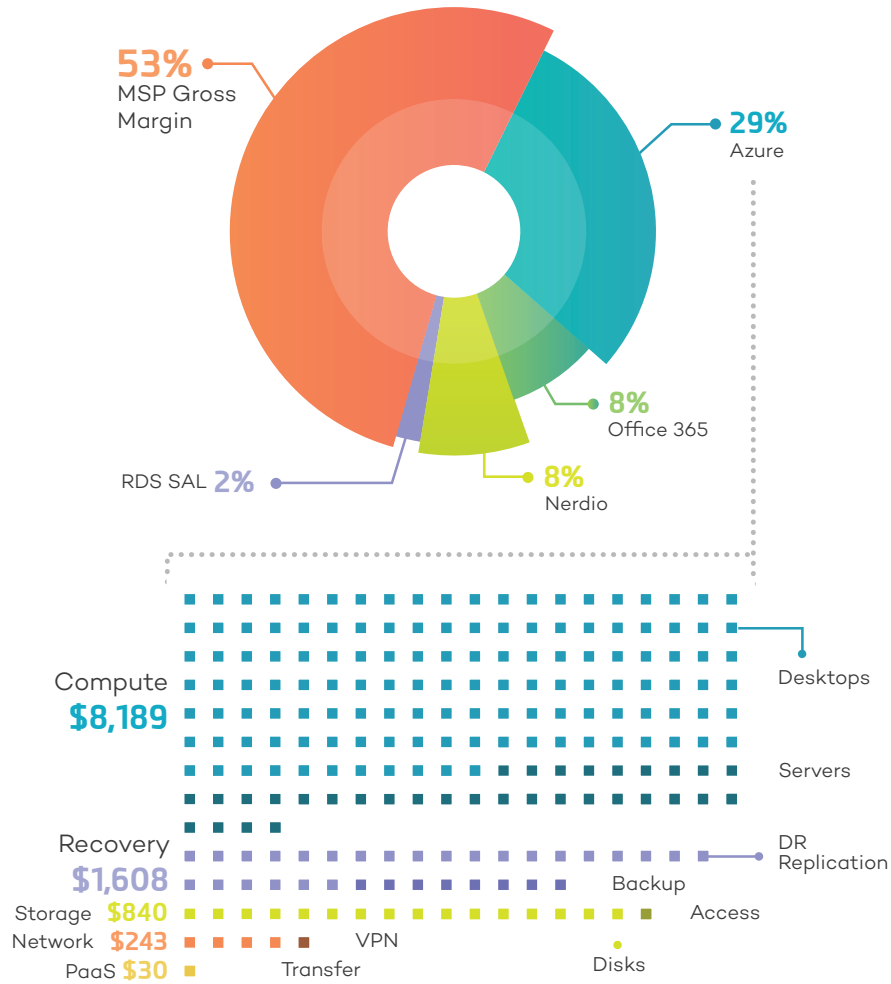

Customer Benefits

MSP Benefits

So, what's in it for MSPs, anyway?
Here's a breakdown of costs and margin:

Nerdio for Azure is ridiculously simple provisioning, management and optimization of complete IT environments in the Microsoft Cloud. It addresses critical challenges by enabling migration to Azure in a couple of hours with just a few clicks, and streamlines the management of these environments on an ongoing basis.
