# About LexisNexis

LexisNexis is a leading global data analysis and information provider that offers platforms to help legal, corporate, government, and nonprofit clients better understand their markets and audiences. They also increase accessibility to legal and journalistic documents. With over 10,000 employees worldwide and customers in 160 countries, LexisNexis IT professionals manage a lot of moving parts every day.

## The Situation

Because LexisNexis was split among multiple uncooperative environments — including RDS, VMWare ESX, and Citrix — the company was overloaded with frustrating and inefficient processes that were costing them a lot of money. LexisNexis needed to simplify their system and save on costs, and their research showed that migrating to Azure was the best way to do both those things.

## The Solution

LexisNexis engaged Coretek to design a Citrix Cloud-compatible solution using Azure Virtual Desktop (AVD), and Coretek recommended Nerdio Manager to facilitate the migration. Nerdio was able to work with the customer to deploy a pilot program to a few hundred users, running Azure alongside Citrix Cloud, within just a few days. After the successful pilot, Nerdio's auto-scale function made it easy for LexisNexis to extend the solution to thousands of users.

## The Results

LexisNexis now runs Nerdio Manager across their organization, enabling synchronicity and consistency and resulting in a 50% year over year cost savings. This new streamlined system has eliminated the need for expensive onsite infrastructure, solved the confusing multi-software departmental billing issues, and reduced their overall software costs.

*“LexisNexis now runs Nerdio Manager across their organization, enabling synchronicity and consistency and resulting in a 50% year over year cost savings.”*

LexisNexis is currently hosting several thousand users on AVD, and with Nerdio’s help, their administrators are managing the day-to-day operations easily and efficiently, with about a 75% decrease in support needs. Most importantly, the performance of their infrastructure has improved significantly: LexisNexis’s former solution was rated at 35/100 and Nerdio Manager is running at above 90/100.

*“LexisNexis’s former solution was rated at 35/100 and Nerdio Manager is running at above 90/100.”*

## About Nerdio

Nerdio empowers IT Professionals to deploy, manage, and auto-scale Azure Virtual Desktop (AVD) and Windows 365. Created to address the technical and security requirements of enterprise customers, Nerdio Manager for Enterprise is ideal for IT Professionals looking to deploy and manage large AVD or Windows 365 environments and can be connected to an existing setup or used to stand up a new deployment. Nerdio Manager is an all-PaaS Azure application that runs in a customer's own Azure subscription, making it one of the most secure and compliant solutions on the market.
