

# Empowering IT Professionals to Deploy and Manage Azure Virtual Desktop and Windows 365

Nerdio Manager for Enterprise extends the native Azure Virtual Desktop and Windows 365 admin experience with best-in-class enterprise capabilities, empowering IT professionals to automate, optimize, and secure AVD & Windows 365 deployments with ease.

## Simplify & Automate

- Deploy a complete AVD or Windows 365 environment in two hours, from start to end-user login
- Manage AVD, Windows 365, and MSIX AppAttach from a complete and powerful portal that is easy to use
- Fully automate image creation, patching, and session host updates without advanced scripting

## Scale & Optimize

- Create dynamic host pools that shrink and expand in response to user demand and time of day
- Save up to 75% on Azure compute and storage consumption with sophisticated Auto-scaling
- Optimize performance and costs by matching infrastructure size to user demand in real-time, at any scale

## Secure & Protect

- Build resilient and highly available AVD and Windows 365 deployments with availability zones
- Implement role-based, “least privilege” administration and enable end-user self-service
- Maintain security compliance with no third-party connectivity to an AVD or Windows 365 environment

## AZURE VIRTUAL DESKTOP

Flexible Azure-based VDI platform

## Windows 365

Easier to deploy and manage  
Fixed price Microsoft 365-based VDI platform

Most cost-efficient, easiest to deploy and manage, and most flexible  
virtual desktop management platform for AVD and Windows 365

### Optimize to Reduce Costs

Compute  
(save up to 75%)

Storage  
(save up to 50%)

Time and effort  
(save up to 80%)

### Automate to Increase Reliability

Images and  
host pools

Integration

Visibility and  
Self-healing

### Simplify Management

Deployment

Ongoing  
Management

Application  
Delivery

## Nerdio Manager for Enterprise Deployment Architecture

- Standalone Azure application, not multi-tenant management service
- Deployed into customer's own Azure subscription
- Not an "Azure Managed Application" – Nerdio has no access
- Deployed and billed through the Azure Marketplace
