

# Nerdio Manager for Enterprise vs. Citrix

## Why Nerdio Manager?

- Native Microsoft technology stack with no third-party vendor lock-in.
- Significant cost savings – No need to purchase any additional licenses.
- Sophisticated auto-scale engine optimizes both compute and storage to significantly reduce Azure consumption up to 75%
- Image creation and management automation for ongoing updates and patching.
- Completely automate image management using an intuitive GUI and basic Azure knowledge.
- No third-party connectivity to customer Azure AD tenant, and customer chooses Azure region to host the management plane for better security and data residency compliance.
- World-class support, onboarding help, and all future software versions included at no additional cost.

Learn how we can help your organization transition from Citrix to AVD using Nerdio Manager for Enterprise.
