

Nerdio Azure Fundamentals

NAF-100

Azure Fundamentals for the modern MSP

Who is this Certification For?

If you're an MSP working in Microsoft Azure, or if you're considering whether Azure is a good fit for your business, then this course is for you!

The first step in building a cloud practice is familiarizing yourself with the fundamental concepts around Microsoft Azure. We'll explore each of these topics and more in this certification, which altogether will give you a firm foundation to build on as you set out on your Azure journey.

Prerequisites

Familiarity with configuring and administrating on-premises environments. The NAF-100 is an excellent entry point for other Microsoft certifications, including:

- MD-102 (*Managing Modern Desktops*)
- AZ-104 (*Microsoft Azure Administrator*)
- AZ-900 (*Microsoft Azure Fundamentals*)

Core Concepts

- Microsoft Azure Services & Resources
- Identity & Identity Management
- The Azure Hierarchy
- Microsoft 365
- Microsoft Intune
- Windows 365
- Azure Virtual Desktop

Nerdio Azure Fundamentals Syllabus

Est. 2–3 Hours

Azure Categories

Explore the service types that MSPs commonly use in the Microsoft Azure cloud computing platform.

Identity & Identity Management Options

Discover the power of Identity and the Identity Management Options available in Microsoft Azure.

Azure Subscriptions

Learn how Subscriptions in Azure help to aggregate billing for Azure services and streamline invoicing.

Resource Groups & Resources

Plan and create logical structure for the services and resources in the environments you support.

The Azure Hierarchy

Delve into each of the level of the Azure Hierarchy and learn more about how they relate to one another.

Selecting Foundational Resources

Get familiar with Compute, Storage, and Networking – three pillar resources that underpin every Azure virtual machine.

Microsoft 365 & Azure

Discover how Microsoft 365 and Azure work together to offer a robust end user experience.

Core Azure Services

Continue your Azure journey with Windows 365, Azure Virtual Desktop, and Microsoft Intune.
