

Score higher with Nerdio Manager and Microsoft Azure

Securely manage Azure Virtual Desktop, Windows 365, and Intune while extending device lifecycles

Remote connectivity and optimizing environments to deliver high-quality end-user experiences poses unique challenges for higher education.

Nerdio Manager for Enterprise enhances Azure Virtual Desktop (AVD) and Windows 365 administration, enabling dynamic resource management, seamless collaboration, and reliable performance for intensive applications and lab setups.

Unlock the power of the cloud

Empower students everywhere:

Enable remote learning in any location and on any device with an internet connection.

Scale resources on demand:

Adjust remote desktop instances and resources according to curriculum needs.

Decrease infrastructure costs:

Eliminate on-premises hardware and employ a flexible consumption model.

Leverage stable vendors:

Benefit from Nerdio and Microsoft's steadfast partnership of innovation and success.

Modernize IT operations

From campus labs to remote learning environments, modern education demands seamless connectivity and efficient IT management. Nerdio Manager empowers universities to transition to the cloud with ease, ensuring reliable performance, simplified operations, and significant cost savings—all while leveraging existing Microsoft tools.

Powering UNF's digital transformation

The University of North Florida (UNF), a public university with about 17,000 students, faced challenges with its on-premises VDI environment due to functionality gaps and hardware limitations, which hindered stable remote desktop services.

UNF rolled out AVD and Nerdio Manager organization-wide, from campus labs, student courses, faculty, developers, and beyond, improving agility while leveraging existing Microsoft licensing. The UNF IT team received glowing feedback from end users and staff, who were thrilled with the remote experience.

Transform lab services

For institutions leveraging Azure Lab Services or wanting to spin up similar labs, Nerdio offers an innovative solution highlighted by these benefits:

- Free 45-day proof-of-concept to leverage Nerdio Manager + AVD to build out production labs.
- 90-day customer success transition team to train your staff to leverage Nerdio automation.
- Flexible pricing with EDU discounts to ensure you have line-of-sight into TCO.

Discover why Nerdio, the 2024 Microsoft Partner of the Year, is the trusted choice for higher education to transform IT operations, enhance flexibility, and drive cost efficiency.
