nerdio

Modernize healthcare operations with Nerdio's next-generation management platform

Nerdio takes Windows to the Cloud to empower employees and scale systems with ease

Healthcare and life sciences organizations increasingly need solutions that enable remote connectivity, maintain system resiliency, connect disparate networks, and help meet strigent regulatory compliance standards.

Enable healthcare resilience in Microsoft Azure with the award-winning Nerdio Manager platform

Nerdio Manager extends the native Azure Virtual Desktop (AVD) and Windows 365 administration experience, facilitating flexible, on-demand resource allocation, remote work and telehealth, and enhanced performance.

Harness the power of Azure

Enpower practitioners and staff:

Enable remote work anywhere on any device with an internet connection.

Scale resources on demand:

Automatically adjust VDI instances and resources to meet fluctuating needs.

Mitigate system downtime:

Increase resilience and ensure continuity of life-critical services.

Enhance ecosystem collaboration:

Reduce up-front investments with pay-as-you-go pricing models.

Nerdio and Azure automate and streamline modern healthcare operations globally with a secure platform for AVD, Windows 365, and physical endpoints on Intune.

Take healthcare resilience to the next level

Nerdio is a Microsoft-only vendor empowering healthcare organizations with a scalable, unified management platform that:

Enhances remote connectivity through AVD, Windows 365, and Azure:

Provides seamless access to virtual desktops and applications, ensuring healthcare professionals can securely and efficiently collaborate and deliver patient care from any location.

Leverages Azure to help strengthen security, compliance, and resilience:

Utilizes Azure's robust security features to protect sensitive patient data, meet stringent regulatory requirements, and maintain operational continuity in the face of evolving threats.

Supports Azure Local to balance on-premises performance with cloud flexibility:

Integrates on-premises infrastructure with the cloud, delivering high performance for critical workloads while offering the scalability and flexibility of the cloud for future growth.

Automation empowers a small team

"

Previously, our VMs on Azure were running 24/7, even on weekends, resulting in significant expenses. However, once we started using Nerdio, we witnessed an 80% savings, bringing our daily costs to almost nothing

Ralph Schepke
Head of digital workplace services

As a 2024 Microsoft Partner of the Year, we're trusted by healthcare organizations to simplify cloud management, reduce costs, and enhance resiliency.
