Centralized insights in Nerdio Manager

End-to-end analytics, intelligence, and monitoring across AVD, Windows 365, and Intune-managed endpoints—built to prove value, cut costs, and keep Microsoft environments running at their best.

Product overview

Nerdio Manager for Enterprise delivers centralized insights that unify endpoint monitoring, including physical and virtual desktops, operational efficiency, cost modeling, and executive dashboards into one powerful suite. It provides IT admins and business leaders with the intelligence they need to troubleshoot faster, optimize environments, and clearly demonstrate business value.

Within Nerdio Manager, organizations now gain:

• Deep technical visibility to resolve issues proactively.

• Measurable efficiency data to quantify IT productivity gains.

• Executive-ready dashboards that show ROI and cost savings.

• Financial intelligence to identify wasted spend and optimize Azure costs.

Core capabilities

Real-Time Insights

Gain unified, agentless, nearly real-time monitoring across AVD, Windows 365, and Intune-managed endpoints.

• User experience monitoring: Tracks logon stages, FSLogix load, RDP performance, and session latency.

• Device and VM performance: Monitors CPU, memory, disk, GPU, and per-process usage.

• Application monitoring: Captures application inventory, usage, launch times, crashes, and reliability scores.

• Alerting: Configurable thresholds and proactive notifications via email, Teams, or ticketing systems.

Outcome: Real-time visibility across all Microsoft endpoints—no third-party tools required.

Operational Efficiency Insights

Quantify IT productivity gains and benchmark against native Microsoft portals.

- Compare Nerdio automation to manual workflows in native Microsoft portals to highlight time savings and reduced operational overhead.

- Track time saved, inputs reduced, and risk avoided.

- Efficiency index shows trends and progress over 30-day windows.

- Export data for finance or stakeholder reporting.

- Get tailored recommendations to improve operational efficiency.

Outcome: Proof that Nerdio reduces IT overhead, risk, and technical debt.

Executive Insights

Visualize ROI and business impact from DaaS deployments with purpose-built dashboards for the C-Suite.

- Report ROI, net present value (NPV), Nerdio savings, usage trends, and performance KPIs.

- High-level, business-friendly views with no technical clutter.

- Exportable charts for leadership or board reporting.

Outcome: Executives clearly see the return on their Microsoft Cloud investment.

Cost Efficiency Insights

Uncover cost optimization opportunities with advanced financial intelligence.

- Pinpoint underutilized or unused resources.

- Model "what-if" scenarios (reserved instances, auto-scale, storage).

- Highlight wasted spend before it impacts budgets.

Outcome: Lower Azure costs, stronger margins, and smarter planning.

The Insights advantage

- Prove value with executive dashboards and exportable ROI reports.

- Reduce costs by eliminating waste and optimizing cloud resources.

- Boost efficiency by quantifying IT productivity gains and automation impact.

- Stay proactive with real-time monitoring, alerts, and deployment visibility.

Note: These capabilities are available in Nerdio Manager for Enterprise 7.5 or later.

Is your organization getting the most from its Microsoft endpoints?

Ask yourself:

- Do we have full visibility into performance and user experience across AVD, Windows 365, and Intune-managed endpoints?

- Can our IT team easily quantify and report the impact of automation?

- Do our executives have the ROI datapoints they expect from their Microsoft investments?

- Are we confident we're not overspending in Azure or missing savings opportunities?

- How quickly could we deploy monitoring at scale and ensure consistent coverage?

How Nerdio Manager helps

Centralized insights unify monitoring with an agentless platform, delivering clear ROI dashboards and identifying wasted spend before it affects your budget. Rapid deployment and broad device coverage make IT investments easier to optimize and justify.

Why customers choose centralized insights in Nerdio Manager

Organizations choose Nerdio Manager because it simplifies the move away from legacy VDI tools and accelerates adoption of Microsoft's market-leading desktop virtualization and endpoint solutions. By connecting technical data to executive reporting, Nerdio Manager bridges the gap between IT and the business, turning complexity into clear, actionable intelligence.

Centralized insights in Nerdio Manager transform IT from being reactive to proactive, making every conversation about the Microsoft Cloud measurable.
