nerdio

Nerdio Monitoring & Insights capability matrix

Near real-time visibility, efficiency tracking, and ROI reporting across Azure Virtual Desktop, Windows 365, and Intune

Nerdio Monitoring & Insights provides organizations with near real-time visibility, performance intelligence, and financial insights across Azure Virtual Desktop (AVD), Windows 365, and Intune-managed endpoints. By unifying monitoring, efficiency tracking, and ROI reporting into a single platform, IT and business leaders can transition from reactive troubleshooting to proactive optimization without requiring third-party tools.

The table below outlines Core and Premium capabilities by device type.

Capability	Description	**Nerdio Manager for Enterprise** Monitoring and Insights by endpoint type:		
		AVD	Windows 365	Intune-managed /physical devices
Logon duration & UX monitoring	Monitors logon stages, FSLogix load, RDP performance, and session latency	Core/Premium	Included	Included *(where applicable)*
FSLogix profile load monitoring	Tracks FSLogix load times and failures	Core/Premium	N/A	N/A
Session performance	Real-time RDP/session latency, bandwidth, and connection quality	Core/Premium	Included	N/A
Device & VM performance	CPU, memory, disk, GPU, per-process usage	Core/Premium	Included	Included
Application monitoring	App inventory, usage, launch times, crashes, reliability	Core/Premium	Included	Included
Network diagnostics	Endpoint connection metrics, latency, route analysis	Core/Premium	Included	Included
Alerting & notifications	Configurable thresholds, email/ Teams/ticketing integrations	Core/Premium	Included	Included
Data retention & export	Configurable retention windows, exportable for reporting	Core/Premium	Included	Included
Operational Efficiency Insights	Reports on automation vs manual effort, time saved, inputs reduced	Premium	Included	N/A
Executive dashboards & ROI reporting	Business-friendly reporting: ROI, NPV, savings, trends	Premium	Included	N/A
Cost Efficiency Insights	What-if modeling, wasted spend analysis, cost optimization	Premium	Included	N/A

Note: AVD capabilities are available in the Core or Premium tiers. If a feature exists in AVD, it's automatically included in Windows 365 and Intune (when applicable).
